**CION INVESTMENT CORPORATION REPORTS SECOND QUARTER 2024 FINANCIAL RESULTS****Disciplined Capital Deployment Contributes to Net Portfolio Growth****For Immediate Release**

NEW YORK, August 8, 2024 — CION Investment Corporation (NYSE: CION) (“CION” or the “Company”) today reported financial results for the second quarter ended June 30, 2024 and filed its Form 10-Q with the U.S. Securities and Exchange Commission.

CION also announced that, on August 5, 2024, its co-chief executive officers declared a third quarter 2024 base distribution of \$0.36 per share, payable on September 17, 2024 to shareholders of record as of September 3, 2024.

SECOND QUARTER AND OTHER HIGHLIGHTS

- Net investment income and earnings per share for the quarter ended June 30, 2024 were \$0.43 per share and \$0.42 per share, respectively;
 - Net asset value per share was \$16.08 as of June 30, 2024 compared to \$16.05 as of March 31, 2024, an increase of \$0.03 per share, or 0.2%. The increase was primarily due to out-earning its distribution by \$0.02 per share and repurchases of the Company's common stock below NAV during the quarter ended June 30, 2024, which was partially offset by realized and unrealized losses of \$0.01 per share;
 - As of June 30, 2024, the Company had \$1.07 billion of total principal amount of debt outstanding, of which 61% was comprised of senior secured bank debt and 39% was comprised of unsecured debt. The Company's net debt-to-equity ratio was 1.13x as of June 30, 2024 compared to 1.03x as of March 31, 2024;
 - As of June 30, 2024, the Company had total investments at fair value of \$1.82 billion in 107 portfolio companies across 24 industries. The investment portfolio was comprised of 85.1% senior secured loans, including 84.3% in first lien investments;¹
 - During the quarter, the Company funded new investment commitments of \$137 million, funded previously unfunded commitments of \$10 million, and had sales and repayments totaling \$77 million, resulting in a net increase to the Company's funded portfolio of \$70 million;
 - As of June 30, 2024, investments on non-accrual status amounted to 1.36% and 2.69% of the total investment portfolio at fair value and amortized cost, respectively, compared to 0.86% and 2.88%, respectively, as of March 31, 2024;
 - During the quarter, the Company repurchased 234,982 shares of its common stock under its 10b5-1 trading plan at an average price of \$11.37 per share for a total repurchase amount of \$2.7 million. Through June 30, 2024, the Company repurchased a total of 3,432,817 shares of its common stock under its 10b5-1 trading plan at an average price of \$9.99 per share for a total repurchase amount of \$34.3 million; and
 - On July 15, 2024, the Company further amended its \$675 million senior secured credit facility with JPMorgan Chase Bank, National Association (“JPM”) to (i) reduce the credit spread on the floating interest rate payable by the Company on advances from the three-month SOFR plus a credit spread of 3.20% per year to the three-month SOFR plus a credit spread of 2.55% per year, and (ii) extend the reinvestment period from July 15, 2024 to June 15, 2026 and the maturity date from May 15, 2025 to June 15, 2027².
-

DISTRIBUTIONS

- For the quarter ended June 30, 2024, the Company paid a quarterly base distribution totaling \$19.3 million, or \$0.36 per share, and declared a mid-year supplemental distribution totaling \$2.7 million, or \$0.05 per share, paid on July 12, 2024 to shareholders of record as of June 28, 2024.

Michael A. Reisner, co-Chief Executive Officer of CION, commented:

"I'm pleased to report that CION continues to perform well, with strong results in net investment income, NAV stability, capital deployment, and portfolio credit performance. We are focused on building a durable franchise here at CION, and believe that CION is uniquely positioned for this environment given our middle market, first lien direct lending focus paired with our opportunistic strategy as we seek to capture alpha in volatile and complex market conditions."

Total investment income for the three months ended June 30, 2024 and March 31, 2024 was \$61.4 million and \$73.6 million, respectively. The decrease in total investment income was primarily driven by higher investment income from origination and restructuring activities and fees received in connection with the repayment of portfolio investments during the three months ended March 31, 2024.

Operating expenses for the three months ended June 30, 2024 and March 31, 2024 were \$38.4 million and \$41.0 million, respectively. The decrease in operating expenses was primarily driven by lower advisory fees due to a decrease in total investment income during the quarter ended June 30, 2024 as compared to the quarter ended March 31, 2024.

ENDNOTES

- 1) The discussion of the investment portfolio excludes short-term investments.
 - 2) The Company incurred certain customary costs and expenses in connection with the JPM fifth amendment and will pay an annual administrative fee of 0.20% on JPM's total financing commitment.
 - 3) Total debt outstanding excludes netting of debt issuance costs of \$8.1 million and \$9.4 million as of June 30, 2024 and March 31, 2024, respectively.
 - 4) The fixed versus floating composition has been calculated as a percentage of performing debt investments measured on a fair value basis, including income producing preferred stock investments and excludes investments, if any, on non-accrual status.
 - 5) Computed based on the (a) annual actual interest rate or yield earned plus amortization of fees and discounts on the performing debt and other income producing investments as of the reporting date, divided by (b) the total performing debt and other income producing investments (excluding investments on non-accrual status) at amortized cost. This calculation excludes exit fees that are receivable upon repayment of the investment.
 - 6) For a particular portfolio company, the Company calculates the level of contractual indebtedness net of cash ("net debt") owed by the portfolio company and compares that amount to measures of cash flow available to service the net debt. To calculate net debt, the Company includes debt that is both senior and pari passu to the tranche of debt owned by it but excludes debt that is legally and contractually subordinated in ranking to the debt owned by the Company. The Company believes this calculation method assists in describing the risk of its portfolio investments, as it takes into consideration contractual rights of repayment of the tranche of debt owned by the Company relative to other senior and junior creditors of a portfolio company. The Company typically calculates cash flow available for debt service at a portfolio company by taking EBITDA for the trailing twelve-month period. Weighted average net debt to EBITDA is weighted based on the fair value of the Company's performing debt investments and excluding investments where net debt to EBITDA may not be the appropriate measure of credit risk, such as cash collateralized loans and investments that are underwritten and covenanted based on recurring revenue.

For a particular portfolio company, the Company also calculates the level of contractual interest expense owed by the portfolio company and compares that amount to EBITDA ("interest coverage ratio"). The Company believes this calculation method assists in describing the risk of its portfolio investments, as it takes into consideration contractual interest obligations of the portfolio company. Weighted average interest coverage is weighted based on the fair value of the Company's performing debt investments, and excludes investments where interest coverage may not be the appropriate measure of credit risk, such as cash collateralized loans and investments that are underwritten and covenanted based on recurring revenue.

Portfolio company statistics, including EBITDA, are derived from the financial statements most recently provided to the Company for each portfolio company as of the reported end date. Statistics of the portfolio companies have not been independently verified by the Company and may reflect a normalized or adjusted amount.
 - 7) Median EBITDA is calculated based on the portfolio company's EBITDA as of the Company's initial investment.

Internal Investment Risk Rating Definitions

Rating Definition

- 1 Indicates the least amount of risk to our initial cost basis. The trends and risk factors for this investment since origination or acquisition are generally favorable, which may include the performance of the portfolio company or a potential exit.
- 2 Indicates a level of risk to our initial cost basis that is similar to the risk to our initial cost basis at the time of origination or acquisition. This portfolio company is generally performing in accordance with our analysis of its business and the full return of principal and interest or dividend is expected.
- 3 **Indicates that the risk to our ability to recoup the cost of such investment has increased since origination or acquisition, but full return of principal and interest or dividend is still expected. A portfolio company with an investment rating of 3 requires closer monitoring.**
- 4 Indicates that the risk to our ability to recoup the cost of such investment has increased significantly since origination or acquisition, including as a result of factors such as declining performance and non-compliance with covenants. We expect some loss of interest, dividend or capital appreciation, but still expect an overall positive internal rate of return on the investment.
- 5 Indicates that the risk to our ability to recoup the cost of such investment has increased materially since origination or acquisition and the portfolio company likely has materially declining performance. Loss of interest or dividend and some loss of principal investment is expected, which would result in an overall negative internal rate of return on the investment.
